

# Fabio Monzani

## Senior UX/UI Designer

### About me

I'm a UX/UI designer with over 14 years of experience crafting intuitive, beautiful interfaces that make life easier for users. Based in Manchester, I'm driven by a passion for turning complex challenges into simple, effective solutions. My work spans diverse industries and cultures, all aimed at designing experiences that feel seamless, relevant, and human across any platform.

### Experience

#### Pod Point

#### Senior UX/UI Designer

5 years

As UX/UI Designer at Pod Point, I enhance existing products and design new features to shape the company's future.

- Designed new features that increased user satisfaction and engagement by 40%.
- Led the redesign of the checkout and onboarding, reducing customer support queries by 60%
- Spearhead the creation of the design system and collaborated across product teams and engineers to increase adoption and enhance accessibility compliance.

#### Loki.code

#### Senior Product Designer

3 years 5m

As Lead Web3 UX/UI Designer at Loki.code, I simplify the complexities of blockchain to create an intuitive DevOps platform for dApp developers.

- Designed an onboarding flow that reduced Web3 entry barriers, increasing developer adoption by 80%.
- Developed a UX product strategy that helped secure 100k in pre-seed funding in the Techstars Web3 Accelerator.
- Conducted 20+ usability test per month leading to data-driven improvements.

#### SAM Labs

#### UX/UI Designer

2 years

As a UX/UI Designer at SAM Labs, I led the redesign of SAM Space, the flagship app across multiple platforms and curated the illustrations across multiple products.

- Redesigned the SAM Space app for multiple platforms, leading to over 50% increase in active users.
- Designed and allied usability improvements that reduced onboarding by 50%.

#### ORDERLY

#### UX/UI Designer

2 years 3m

At ORDERLY I led the design of an all-in-one inventory management platform for the hospitality industry.

- Led full design and launch of an MVP in 3 months, supporting rapid go to market success.
- Designed intuitive workflows that decreased user errors by more than 70% and increased speed of operation by 200%.
